

Nicholas Scholey

28th December 1984 – 29th July 2026

The Midland Institute of Mining Engineers has belatedly been made aware that one of our former Past Presidents, Nicholas (Nick) Scholey, sadly passed away on 29th July 2026 after suffering a short illness. Nick was 41 years of age and had been a former President of the Midland Institute of Mining Engineers in the years 2011-2012.

Nick attended Ranby House School and Worksop College, he studied at the University of Leeds and Imperial College London, Royal School of Mines, completing a Master's Degree in Metals and Energy Finance.

Nick eventually returned to work in the family business, spending much of his working life alongside his family, the business being locally based between Retford and Bawtry in the sand and gravel minerals extractive sector.

He and his parents and brother shared a longstanding love of steam engines, rallies and shows, including serving as President of the Midland Institute of Mining Engineers. Nick was married to his wife Stephanie and had two daughters.

Nick's sudden loss at only 41 will come as a shock to many of us having passed away at such a young age.

His funeral took place on the Saturday 5th of September at St Mary & St Martin's Church, Blyth, Notts.

The Midland Institute of Mining Engineers would like to extend our sincere condolences to Stephanie, her two daughters Persephone and Cressida as well as to Nick's close and extended family and friends.
